# Products for horticulture

- „OGRODNIK” twine for use in greenhouse
- „LUPULINA” twine for use on hop plantation

Agriculture and horticulture twines belong to large assortment of Defalin's products.

Made of the highest quality raw materials, they guarantee splendid physical properties. Through application of the appropriate production technology, they fully satisfy expectations of the users in gardening, fruit farming, greenhouse and foil-wrapped cultivation, as well as on hop and tobacco plantations.

## Products for horticulture

Twine for use in greenhouse

### Ogrodnik

The agriculture twine „OGRODNIK“ type is also recommended for use in gardening. Its physical properties allow for use in difficult conditions in greenhouses. Effect of the sun radiation gets eliminated through adding right amount of UV stabilizer to the PP raw material. This twine is soft to the touch which makes it plant-friendly (reduced risk of breaking sprouts led along the twine) and makes easier the task of tying up plants. Balls of „OGRODNIK“ twine are wound up without knots which allows for smooth unwinding the balls.

Number of meters per kg (m/kg):	<b>1000</b>
Breaking strength (kG):	<b>37</b>
Knot strength (kG):	<b>4,0</b>
Number of meters per spool (m):	<b>4000</b>
Number of meters per package (m):	<b>4000</b>

Twine for use on hop plantation

### Lupulina

LUPULINA is an agriculture twine enriched with additional weave. During the process of growth stems of hop creep up the hanging down twines and this additional weave gives them additional support and makes that creeping easier. Also, such additional weave is for the creeper a perfect hook-point and protects the plant against sudden slipping down. In every full package, each one of the twine's threads is made without knots. These threads twisted together guarantee high break resistance. In order to reduce effect of the sun radiation, the LUPOLINA twine contains proper amount of the UV stabilizer additive.

Number of meters per kg (m/kg):	<b>700</b>
Breaking strength (kG):	<b>56</b>
Knot strength (kG):	<b>4,8</b>
Number of meters per spool (m):	<b>3360</b>
Number of meters per package (m):	<b>6720</b>
